PROFESSIONAL SUMMARY

Motivated and detail-oriented MCA candidate with hands-on experience in web development, cloud computing, and DevOps practices. Proficient in HTML, CSS, JavaScript, Node.js, and modern frameworks like React. Practical knowledge of CI/CD pipelines, Docker, and AWS cloud services. Passionate about building scalable and efficient applications with a strong foundation in both frontend and backend technologies.

EDUCATION

- **Master of Computer Applications (Pursuing)**
Guru Nanak Dev University, Amritsar
- **Bachelor of Computer Applications (BCA) – May 2023 | 70.75%**
Guru Nanak Dev University, Lamini Campus, Pathankot
- **12th (Science) – CBSE – March 2020 | 60%**
Presentation Public School, Jugial

CERTIFICATIONS & TRAINING

Cloud Computing Training – 6 Months

PI Soft Informatics, Mohali | Jan 2025 – June 2025 | (Pursuing)

Hands-on experience with AWS services like EC2, S3, IAM, VPC, Lambda

Built and deployed web applications using Terraform and Docker

Implemented secure and scalable cloud infrastructure following best practices

Digital Marketing MOOC (online)

Swayam (Online) | Jan 2024 – Apr 2024

PROJECT

TestPrep with Organization Dashboard | Feb 2023 – May 2023

A full-stack web application for test management and simulation

Tech Stack: React.js (Vite), Node.js, Express.js, MongoDB, JWT, bcrypt, GitHub Actions, Docker.

- Built an advanced full-stack web application that allows organizations to create and manage tests and users to take tests in a simulated exam environment.
- Developed the frontend using React with Vite and the backend with Express.js, secured with JWT and bcrypt for authentication. Used MongoDB for data storage.
- Implemented CI/CD pipelines using GitHub Actions to automate frontend builds and Docker images for deployment.

AWS LocalStack Cloud Storage Dashboard | April 2025 | associated with cloud computing training

A simulated cloud storage solution replicating storage service functionalities.

Tech Stack: React + Vite, Express.js, AWS (S3, Lambda, DynamoDB via LocalStack), Docker.

- Developed a local cloud storage dashboard with AWS LocalStack simulating real AWS services
- Designed a React frontend for file operations and implemented backend interactions with LocalStack services using aws-sdk with express.js
- Created a Lambda function to store file metadata in DynamoDB upon uploads.

Online Mock Test Site | Feb 2023 – Apr 2023

- Created a full-stack web application to emulate competitive exams, featuring secure user registration and a personalized dashboard.
- Enabled users to take tests of various lengths with a countdown timer and downloadable PDF summaries of results.

House Rental Website | Mar 2023 – Apr 2023

A platform for renting properties, showcasing available listings.

Tech Stack: PHP, MySQL

- Developed a dynamic listing platform for property rentals.
- Utilized PHP and MySQL to create a clean UI for browsing and listing rental properties.

SKILLS

Languages: C++, Python, HTML, CSS, JavaScript

Frontend: React.js (with Vite), Tailwind CSS

Backend: Node.js, Express.js

Cloud & DevOps: AWS (S3, Lambda, DynamoDB, IAM, EC2, VPC, Cloud Formation), LocalStack, Terraform, Docker, Git

Databases: MySQL, MongoDB, DynamoDB

Tools: Visual Studio Code, GitHub Actions

Soft Skills: Problem-solving, Communication, Teamwork, Time Management

Declaration

I here declare that the information provided above is true to the best of my knowledge and belief.
