PROJECT

Online Mock Test Site || Feb 2023 – Apr 2023 || Link: [\[Click Here\]](#)

- Developed a web-based application to help users prepare for exams by taking mock tests in subjects like aptitude, reasoning, and general awareness.
- Utilized HTML, CSS, and JavaScript for the front-end, and Node.js with Express for the back-end, along with MySQL for database management.
- Key Features:
 - Secure login and registration to personalize user experience.
 - Users can take tests of different lengths and in various types from dashboard.
 - Provides a downloadable PDF summary of test results for users.
 - Integrated a timer to simulate real exam conditions and track test duration.

House rental Site (PHP and MySQL) || March 2023 – Apr 2023 || Link: [\[Click Here\]](#)

- Developed house rental platform enabling property listing and detailed property views for potential buyers and sellers.
 - Key features include:
 - Seamless listing of available properties with comprehensive details.
 - User-friendly interface for browsing listings and contacting interested parties.
-
